

HULK Earth Anchors

DEADMAN TREE ANCHOR KITS 'M Type'

The HULK Deadman anchoring kit is a below ground anchoring system. Perfect for use on tree plantings in parks, playgrounds, along footpaths, or where stakes or guy wires are not desired or possible. Making use of sleepers or kerbstones allows the kits to be used in situations where traditional Hulk Tree anchoring kits cannot be used, such as difficult urban environments where services are present.

The kits are used to anchor trees up to 7 meters high and are available in 3 and 4 leg systems to cater for different root ball sizes. Kits include deadman choker slings, tensioning tendons with ratchets, compressions mats and full installation instructions.

TOP VIEW OF AN INSTALLED 3 LEG DEADMAN KIT:

Care must be taken to ensure that the Deadman anchors are installed at least 30cm below the base of the tree's root ball and soil to be compacted to a sufficient amount to ensure the stability of the planted tree.

HULK DEADMAN TREE KIT 'M' TYPE:

Model #	Tree Height(m), Calliper(mm) and Planter size (L)	Kit Contents
FRF1DM	2.5-4.5 / 100-250 Up to 400L	3 X HULK 3mmØ Deadman Slings, 1 X 3.5m galvanised tendon with ratchet and 3 x compression mats
FRF1DM4	2.5-4.5 / 100-250 Up to 400L	4 X HULK 3mmØ Deadman Slings, 2 X 3.5m galvanised tendon with ratchet and 4 x compression mats
FRF2DM	4.5-7.5 / 250-450 Up to 800L	3 X HULK 4mmØ Deadman Slings, 1 X 5.5m galvanised tendon with ratchet and 3 x compression mats
FRF2DM4	4.5-7.5 / 250-450 Up to 800L	4 X HULK 4mmØ Deadman Slings, 2 X 5.5m galvanised tendon with ratchet and 4 x compression mats
FRF3DM	7.5-12.0 / 450-750 Up to 2000L	3 X HULK 6mmØ Deadman Slings, 1 X 7.5m galvanised tendon with ratchet and 3 x compression mats
FRF3DM4	7.5-12.0 / 450-750 Up to 2000L	4 X HULK 6mmØ Deadman Slings, 2 X 7.5m galvanised tendon with ratchet and 4 x compression mats

One kit anchors one tree. Installation instructions included. Stem calliper is measured 300mm above the ground
